## 7 Kitchen Design Trends You Won't Want to Miss in 2023

Every kitchen should be both beautiful and functional, and new trends can bring a fresh spark of inspiration for you to enjoy the kitchen of your dreams. If you like incorporating trends into your space, think about adding some of these into your kitchen this year.

### 1 Pendant Lighting

Pendant lighting hangs down from the ceiling by rod or chain and moves light closer to working surfaces for improved visibility. One of the easiest types of lighting to install, pendant lighting comes in an array of styles, shapes, colors, and designs, so they can be fully customized to your style and preferences.

### 2 Touch of Color

A touch of color in your kitchen cabinets within the central island adds an eye-catching swath of period-appropriate color that grounds the center of the open kitchen, a perfect complement to its white surrounding cabinetry and warm wood flooring.

A close-up photograph of a high arc faucet in a kitchen sink. The faucet is a polished brass or copper color, featuring a tall, curved spout. It is set against a white marble backsplash with grey veining. The sink is a white composite material, and the surrounding cabinetry is a dark grey color with brass handles.

### 3 High Arc Faucets

A high arc faucet is the perfect addition to a busy kitchen, especially if you have a large, deep sink. Not only do they look sophisticated, but they come in good use since they make it easy to accommodate tall pots for cooking and cleaning. High arc faucets come available with different features, so if you want one that sprays or swivels, you'll be able to find one.

A photograph of a kitchen featuring open shelving. The cabinets are white with a classic shaker-style design. The upper cabinets have glass-front doors with white lattice patterns. The countertop is a speckled granite, and the backsplash is made of light-colored subway tiles. A window with a white frame is visible, and a stainless steel range hood is mounted above the stove.

### 4 Open Shelving

Kitchens can be incredibly busy places. Open cabinets allow for you to get what you need and put it back much faster while allowing you to also use the open cabinet to display elegant tableware or cookware at the same time.

Open cabinets can also make the kitchen feel much larger and more spacious. Display cabinets can be either open or covered by glass to allow everyone to see inside. If your kitchen's color scheme is dark, this can add a lighter theme to the kitchen and provide a beautiful contrast.

A photograph of a kitchen with marble countertops. The kitchen features light grey or blue-grey cabinetry with brass handles. A large island with a white marble countertop is in the foreground, topped with a white vase of tulips. The background shows a stainless steel range hood, a gas stove, and a sink area with a white marble countertop.

### 5 Marble Countertops

Marble countertops offer a luxurious, timeless look for your kitchen. With many types of marble available, you can choose from several shades to find the type that meets your style needs. If you want a bright kitchen, you can opt for clean, white marble countertops, as they reflect light beautifully.

## Statement Range Hoods

Range hoods aren't just functional these days — they can also make a big statement in your kitchen. Beyond helping to reduce smoke, steam, and odors caused by cooking, range hoods can act as a design centerpiece. From those that are custom designed to match your cabinets to ones that are shiplapped, tiled, or woodworked, the possibilities for a statement range hood are endless.

7

## Square Cabinet Handles

New hardware is one of the simplest ways to update your kitchen because it's quick, affordable, and provides quite the transformation, considering how easy it is to do! Right now, everyone is reaching for square cabinet handles. If you'd like to go beyond the traditional colors of black, silver, and gold for your handles, you can spray paint them in your ideal color to achieve the exact look you want.

## What's Next for Your Kitchen?

At Kustom Kabinetry, we believe your kitchen should be the heart of your home, where you gather with friends and family to make memories you'll cherish for years to come. For over 25 years, we've been in the business of making that happen for homeowners in and around Perry, New York. Our team joyfully builds and installs custom cabinets that create a space everyone will enjoy. At the end of the day, we want you to love your new cabinets so you can make your kitchen the heart of your home.
